

Conversion table for microwave timing

myinheritedkitchen.co.uk

If the power rating in any recipe isn't the same as your microwave use this chart for approximate conversions. The principle is to add 5 seconds per minute per 50 watts that your oven is rated lower or delete 5 seconds per 50watt per minute if your microwave is rated higher. See how it works in practice with the conversion timing for 1 minute. (*Note: all times are rounded to the nearest 5 secs.*). Test the numbers with your microwave and insert your own timings in the last column.

1,000 Watt	950	900	850	800	750	700	650	600	550	500	Your times
10 minutes	10m 50s	11m 40s	12m 30s	13m 20s	14m 10s	15m 0s	15m 50s	16m 35s	17m 30s	18m 20s	
9 minutes	9m 45s	10m 30s	11m 15s	12m 0s	12m 45s	13m 30s	14m 15s	14m 25s	15m 45s	16m 30s	
8 minutes	8m 40s	9m 20s	10m 00s	10m 40s	11m 20s	12m 00s	12m 40s	13m 20s	14m 00s	14m 40s
